

SHREYA JAIN

I am an architecture student currently pursuing my bachelors degree(5th year) from Indira Gandhi Delhi Technical University for women, Kashmere gate, Delhi. I am a curious learner and I consider my primary competencies to be problem solving, creative thinking, and observation. One of the things I enjoy the most about being an architecture student is being able to apply my academic learning in practical life. I am really interested in developing and materializing my ideas while utilizing my architectural knowledge and skills.
