

VAIDEHI VARSHNEY

BUDDING ARCHITECT

ABOUT ME

I am a young & passionate, future Architect with a thorough grasp of the principles of Design & Architecture, paired with a handful of skills related to the field. I believe in Architecture as the art or practice of Sustainable, Biophilic, Economical, Social, Environmental & Construction that aims to provide its users with a sense of place, comfort, efficiency, safety & belonging. Throughout my degree, I have learned to approach criteria such as the inter-relationship between site context & buildings, and Urban issues, socially & environmentally driven, energy-efficient spaces, using passive green building strategies, to ultimately achieve a sustainable building design.
