

namastey!

Now that I got your attention.

Hi, I am Anushka currently in my 5th year of Architecture undergraduate degree.

This portfolio that you're about to look at is a compilation of my academic works till now.

Experimenting with forms, materials and structures in the past 4 years has helped me develop a sense of understanding of the user better and hence working on building more user centric experiences has been the focal point of my projects. A diligent and user - driven approach helps me to inculcate a better design solution.

Being in the leading role at various stages of my life has shaped me as a responsible, punctual, problem solver and empath. An easy going nature and strong communication skills adds a charm to my overall personality.
